# Ian Hildebrand

San Francisco, California | hello@hildy.io | linkedin.com/in/ian-hildebrand | github.com/ihildy

## EDUCATION

**The University of Texas at Dallas** (Expected)
*Bachelor of Science, Information Systems and Technology, IT Product Development Track* **GPA 3.72**
Dean's List in Fall 2024 and Spring 2025

## PROFESSIONAL EXPERIENCE

**Google Labs**, Mountain View, CA January 2026 – Current
*Software Engineer - LLM Applications*

- *Software Engineering:* Pushing barriers of autonomous AI coding agents alongside Google DeepMind.
- *LLM Improvement:* Working with Research Engineers to develop state of the art Gemini models.
- *AI Preparedness:* Developing tools and agents to increase organization productivity.

**GreekPoints**, Dallas, TX March 2024 – November 2025
*Senior Developer & Founder*

- *Software Engineering:* Architected and developed a donation platform for fraternities to raise $25,000 for charity.
- *Financial Integrations:* Leveraged multiple payment processor and treasurer platforms for seamless experience.
- *Tooling & CI Readiness:* Developed a full continuous integration pipeline for safe production deployments.

**Linear Consulting**, Austin, TX October 2019 – April 2024
*Senior Developer & Founder*

- *Software Engineering:* Full-stack developer of over 300 websites, platforms, and automation tools.
- *Business Consulting:* Partnered with technology startup companies to build their brand, website, GTM strategy, social media, marketing strategy, to more than 700 clients that generated over $10 Million in revenue.
- *Team Building:* Built a team of 10 contractors, including developers, design teams, marketing, and CPAs.

**H-E-B Digital**, Austin, TX May 2023 – August 2023
*Research & Software Engineer Intern*

- *Prototype Engineering:* Developed a prototype currently being used in 440+ stores across Texas and Mexico.
- *U/X Improvements:* Leveraged Generative AI to automatically select the most similar replacement item to improve the experience of in-store shoppers and curbside and delivery customers.
- *Team Collaborator and Presenter:* Partnered with data science, software engineering, applications, and machine learning teams to develop the prototype. Presented project to H-E-B's CTO and internal innovation conference.

**H-E-B Digital**, Austin, TX May 2022 – July 2022
*Software Engineer Intern*

- *Engineering:* Designed, developed, and integrated solutions in ARC GIS, sourced data from internal and external sources. Analyzed systems and databases for enhancements and solve business needs across departments.
- *Cross Functional Team Member:* Worked with data science, customer analytics, and statistics teams to align goals across the organization. Presented results to H-E-B's customer engagement team.

## PROJECT EXPERIENCE

**Home-Lab Server Infrastructure**

- Setup personal cloud computing infrastructure with rack-mount servers. Negotiated static IPs with internet provider.
- Configured Ubuntu Server, Docker, Reverse Proxy, Cloudflare Zero Trust, Nginx, PostgreSQL databases.

## SKILLS

**Tools:** GCP, AWS, Visual Studio Code, Cursor, Git, GitHub, Figma, Jira, Linear, Salesforce, Microsoft Office 2016
**Languages:** C++, TypeScript, Node.js, Java, Python, SQL, MongoDB, React, CSS
**Technical:** Infrastructure System Design, Generative AI Engineering, Problem Solving, Root Cause Analysis, Critical Thinking, Process Automation, User Experience and Interface Design, Data Science, Business Innovation
